GOOD FOR YOU.
BETTER FOR THE PLANET!

We believe great stays should feel good - today and tomorrow. That's why we take care of our guests, our people, and the world around us. We're proud to be Green Key certified, the leading international label for sustainable hospitality.

Small Choices, Big Impact

Want to help? It's easy:

- Reuse your towels by hanging them up
- Explore by bike or public transport
- Ask our team for tips on nearby nature and local gems
- Bring your own refillable bottle or cup
- Shop local when choosing souvenirs
- Use the recycling bins in your room

Thoughtful Choices, Every Day

- Many paper products have an ecolabel, such as toilet paper and tissues
- Our housekeeping team uses eco-certified cleaning products - better for them and the planet
- Our plant-forward menu makes room for vegetarian and vegan favorites
- We optimize housekeeping services by not changing bedlinen daily, but on request or when necessary
- DripDrop umbrellas made from recycled plastic, with each rental a tree is planted

People at the Heart

- Our Green Team keeps sustainability moving across the hotel
- Every team member receives sustainability training
- We support local initiatives through programs like the Marriott Junior Council

Comfort, With a Conscience

- 99% of our lighting is energy-saving LED keeping things bright while using less energy
- At least 75% of our showers deliver full comfort using just 9 liters of water per minute
- We only purchase EU wine, reducing travel CO_2
- When windows open the heating or cooling automatically turns off

Less Waste, More Impact

- You'll find refillable bathroom dispensers instead of single-use plastics
- We sort and recycle waste wherever possible
- We aim to work with the principle 'reduce, reuse, recycle'
- At breakfast, we focus on fresh, delicious options with minimal packaging
